often believe in a more holistic approach to their care, we have to provide an environment that meets both genetic and lifestyle-related needs. Our patients want to work with their physicians to create a wellness program that will help them live better than the traditional three-party process.

"By integrating the components of the Technology of Personalized Medicine, the physical office can become more effective in meeting the patient's needs and their relationship to illness. The patient can become more effective in addressing any health issues and can
